

LIBRA™ CART

Grain Cart Scale

App-Based Grain Cart Weighing and Harvest Management

LIBRA™ CART

The Libra Cart hardware connects to your grain cart's load cells and wirelessly communicates with the Libra Harvest app through Bluetooth®.

It automatically detects and records every unload from your grain cart without additional sensors, providing accurate, real-time harvest data on your tablet or smartphone – no need to press any buttons or write anything down.

- ✓ Simplify harvest data collection
- ✓ Reduce cab clutter
- ✓ Load trucks to their road legal limit
- ✓ Track inventory and get valuable insights
- ✓ Calibrate the combine's yield monitor

Customer Testimonials

"THIS IS AN INCREDIBLY SIMPLE TECHNOLOGY THAT MAKES A GRAIN CART SCALE INTO SOMETHING USEFUL."

— ROB STONE, DAVIDSON, SK

"Libra Cart was within 1% of actual bushels harvested.
Pretty damn impressed."

— Jeff Miller, Mt. Vernon, SD

"I wish every piece of tech I used was this easy to run and as reliable."

— Randy Uhrmacher, Hastings, NE

"Thanks to Agrimatics, every truck leaves the field legally loaded."

— Landon Friesen, Crystal City, MB

"Love my Libra Cart. I wouldn't want to be without it."

— Tom Roden, Casselton, ND

Hardware Features

Easy to Install

Plug and Play! Mounts directly onto your cart and connects to any industry-standard load cells

Wireless

No cables across the hitch, making it easy to switch tractors

Powered by 12V or Battery

Outlasts the harvest season for most farms on a single battery (included), or can be optionally powered by 12V

Quick to Calibrate

Uses a certified weight from an elevator or trusted scale for quick calibration

Weatherproof

Built to withstand extreme temperatures and high vibrations

Moisture Sensor Compatible

Updates moisture manually or automatically with a compatible moisture sensor available through Agrimatics' distributors

Download the free Libra Harvest app!

App Features

Automatic Unload Detection

Automatically saves the date, time, GPS location*, and weight of every unload

*if mobile device supports GPS

Record Offline

Collects and saves harvest data into the app whether or not your mobile device is connected to the Internet

Track Fields, Trucks, Destinations

View totals and weight transactions for every field, truck, and destination (bins, bags, elevators, contracts)

Manage Inventory

Transfer amounts from one destination to another to track what has been moved or sold

Calibrate Yield Monitor

View live cart weights from other mobile devices within range to calibrate the combine's yield monitor

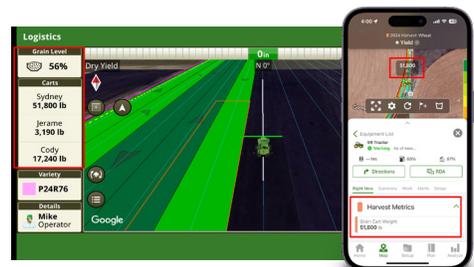

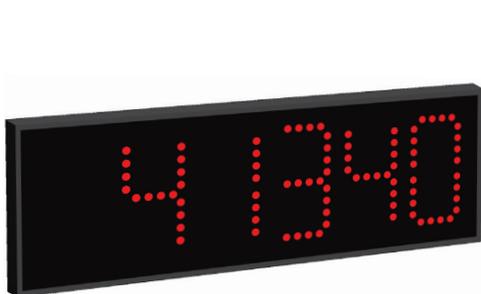

Share and Export Data

Export your detailed harvest records at any time. Share to crop insurance agents, agronomists, or others on your farm

SERIAL LINK

A New Libra Cart Accessory with Two Powerful Features

External LED Scoreboard Compatibility

View live grain cart weights from Libra Cart on a scoreboard display on the side of your grain cart

John Deere Grain Harvest Weight Sharing

View live grain cart weights on John Deere Displays (Gen 4 or Gen 5), and in Operations Center

Agrimatics Cloud Service

Basic Features

INCLUDED - FREE

The cloud service protects your data in case of a lost or damaged mobile device by automatically backing up your harvest data whenever the mobile device has an Internet connection.

View your harvest data from our desktop web app and provide others with free web access to share the information with them if you need.

Pro Features

Annual Fee*

Cloud Pro includes all features of Basic, provides the ability to sync harvest data to other mobile devices, and web features such as harvest reports, software integrations, and more.

Edit, create, and archive your harvest data on the desktop web app

View and download advanced harvest reports

Field Totals, Field Details, Field Allocation, Truck Totals, Truck Details, Destination Totals, Summary

Integrate with our software partners

John Deere Operations Center, CNH Field Ops, Trimble Ag Software, Harvest Profit, OPI Systems, Pipe Ag, Cropwise Operations

Automatic Field Selection

Available on GPS capable mobile devices with our John Deere Operations Center, CNH Field Ops, and Pipe Ag integrations

Instantly sync harvest data to other pro mobile devices to:**

- > view field, truck, destination totals and weight transactions
- > create or edit data
- > remotely transfer load data from truck to destination
- > merge data from multiple grain carts

*visit agrimatics.com for pricing

**when an Internet connection is available

Manage your harvest data from
wherever you are
